

Job title: Product Owner

100% Remote Worldwide
Full-time

To apply for this position please send your CV to recruitment@nUNET.io with the job title as the subject line.

The Company

NuNet, a spinoff of SingularityNet, is a multi-sided platform for shared and globally distributed computing. NuNet platform is the open source software, designed to be an extremely flexible network, encompassing mobile consumer devices, edge computing and IoT devices alongside PCs, servers and data centers, allowing seamless interoperability among its components and intelligent automation of workflow design. NuNet leverages Web3 technologies, serverless container execution, service mesh orchestration, crypto-economy and more, toward creation of the decentralized “world computer”.

For more information about NuNet see:

- Webpage at <https://nUNET.io>;
- Whitepaper at https://nUNET-io.github.io/public/NuNet_Whitepaper_2.0.pdf
- Current roadmap at <https://nUNET.io/roadmap/>;
- Public issue tracker: [Atlassian Jira](#);

For more information about NuNet's development outlook and design, pertinent to this job role, see the following Medium [blog post](#). The applicant will be responsible for setting up and carrying out the process explained in that blog post.

Job Description

We are actively expanding our team and fully redesigning development flow, Agile processes, supporting tool suite, technical documentation portal and CI/CD pipelines. We are looking for a person to take a leading role in this process and help us design processes and structures for supporting the most efficient development cycles, synchronised with our highly ambitious technical roadmap and business goals.

For this purpose we have opened a position for a Product Owner to ensure the development of a product that satisfies users' needs to the highest standard.

As NuNet is a startup with an exciting journey ahead, your contributions will have a great impact on the future of the company and you would get the opportunity to grow it and grow alongside it.

Responsibilities

As a Product Owner, you will be responsible for designing product features, prioritising development focus, estimating and requesting budget, manage product roadmap and backlog, help the development team understand the roadmap along with features to be implemented and direct the scrum master on arrangement of task breakdown and priority.

In your role as a Product Owner you will be communicating and coordinating with CEO, Tech Lead, Scrum Master, the development team and stakeholders to make sure that product development and backlog prioritisation is focused on delivering product to users in a timely and cost effective manner.

As Product Owner, your duties will include:

- Full understanding of the goal NuNet aims to achieve and the gaps that must be filled and work towards
- Shape product vision into a manageable set of tasks and allocate resources towards its development
- Working closely with the development team and scrum master as part of the scrum team to ensure the correct prioritisation of product backlog
- Create product roadmap, Epics and User Stories
- Manage Epic, Story and task prioritisation
- Ensuring the development team understands the product backlog and make sure of its deliverability
- Assess value, develop cases, and prioritize stories, epics and themes to ensure work focuses on those with maximum value that are aligned with product strategy
- Manage Stakeholder communication and expectations by directly interacting with stakeholders to understand their needs and requests
- Represent the team to stakeholders
- Represent Business and Stakeholders to the the development team
- Make decisions on when to release a product or a feature
- Accept/Reject Development team's work

Requirements

- Good working knowledge / experience of Atlassian Jira/Confluence ;
- Outstanding communication, facilitation, negotiation, and coaching skills;
- Understanding Agile values and principles; knowledge of an agile framework or method (i.e. Scrum, Kanban), or understanding of software development life cycle models as well as in-depth knowledge of traditional project management principles and practices
- Good working knowledge or experience at refinement, story splitting, estimation, velocity, and retrospection;
- Skills required for planning and problem solving with product management and delivery teams

Education, Experience, and Licensing Requirements:

- Master's degree and 4 years of software product or project management experience, or 3 years of project development experience on an Agile Team or an equivalent combination of education and work experience
- Demonstrated experience facilitating meetings at multiple levels of an organisation and an understanding of facilitation techniques
- Previous experience as a Product Owner or Manager
- Experience with Blockchain technologies

- Excellent communication skills and ability to work as part of a team
- Fluent English

Benefits

- Flexible schedule
- Remote work - ability to work from anywhere
- Reimbursement for work related expenditures
- Token Vesting options
